Spotlight:
Kentucky Public Service Recognition Week

This week is Public Service Recognition Week in Kentucky. A national celebration that began in 1985, the week is set aside to honor the men and women who serve our nation as federal, state, county and local government employees.

Many thanks to each and every one of you for the work you do every day. While facing budget constraints or other challenges, you continue to serve Kentuckians and other government agencies. Our employees are among the very best in state government and I am honored to serve as your secretary.

I am proud of the work you do. From information technology, procurement, financial controls, tax administration, asset management, facilities, local government support, and more—you are committed to providing services in the most professional, efficient and transparent manner to client agencies and to Kentuckians.

I want to sincerely and personally thank you for your continued dedication and for your desire to make a difference in the lives of our citizens.

I hear so many wonderful things that Finance employees and contractors do. From going above and beyond in your daily tasks, to taking on special projects to volunteering and giving back to your communities—I am amazed at your resourcefulness and your enthusiasm. You are truly appreciated.

With supervisor approval, state employees may be provided up to two hours time to attend.

Governor Proclaims October as Cyber Security Awareness Month

Encouraging citizens to make sure they take necessary precautions while online and understand good cyber security practices are key reason Governor Steve Beshear has joined other states and declared October as Cyber Security Awareness Month in Kentucky.

"Technology is part of our everyday lives and everyone must be vigilant in protecting their personal information," said Gov. Beshear. "Increasingly, more and more state government interactions are available online, which means the Commonwealth Office of Technology is constantly monitoring and using the latest tools available to protect data."

In observation of Cyber Security Month, COT Office of the Chief Information Security Officer (CISO) Katrina LeMay encourages state staff to become involved by taking advantage of opportunities to be aware of security threats so they can better protect the commonwealth 's data as well as their own personal data.

During October, CISO will be hosting several presentations in Frankfort. For more information on these please go to http://technology.ky.gov/ciso/Pages/CyberSecurityAwarenessMonth.aspx.

Other opportunities for education and material are with the Multi-State Information Sharing and Analysis Center (MS-ISAC). MS-ISAC 2015 National Cyber Security Awareness Month material can we found here: http://msisac.cisecurity.org/resources/toolkit/Oct15/index.cfm.
